validation training

Validation Training: not just an FDA requirement, it pays big dividends

Formal Classroom and Workstation Training

Validation: the training challenge

Training your staff for today's validation requirements is a big challenge. Sure, there are plenty of very expensive seminars available. You can attend most pharmaceutical trade or professional organizations and hear someone talk about validation. After all, it has been a legal requirement since 1979.

Frankly, most of these resources share the same shortcoming: they are long on theory, and short on practice. At Gavin Pharmaceutical Services (GPS), we believe in sound validation theory, and we teach it better than anyone. However, we find that unless actual practice (genuine how-to-do-it practice) is a dominant part of the teaching curricula, the average student emerges scratching his head, not at all sure how to get something done. Our training benefits your staff by teaching practical validation how-to skills.

Quality

We always stress quality. Always. We continue to find a real gap in the quality of validation work these days. We do our best to reverse the trend.

Training Module Topics

The following is a representative sampling of the training modules we have developed. Most modules last from 45-90 minutes, depending on time available and desired depth. Naturally, we will be glad to customize a program that best fits your needs.

TRAINING MODULE TOPICS

1. **Principles of cGMP:** The fundamentals from a validation perspective
2. **Validation for Compliance:** GMP Principles of Validation
3. **Validation Fundamentals:** A Primer for Validation Practice
4. **Validation Testing**
5. **Validation Failure**
6. **Instrument Calibration:** How to Review an Established Plan
7. **ASME: Code Vessels**
8. **Cleaning Validation Training**
9. **Flow Programming** in Pharmaceutical Plant Design
10. **PID Control:** Fundamental Concepts
11. **Validation Test Instruments:** A practical workshop
12. **Pharmaceutical Compendia:** An Introduction to the USP/NF

Training Courses

The following training courses are one half day to one day courses. They are designed as practical introductions.

TRAINING COURSES

1. **Computer Validation Introduction** for Computer Service Technicians
2. **Computer Validation Introduction** for Controls Integrators (Parts 11, 211)
3. **Pharmaceutical Engineering Survival Course**
4. **Writing SOP's for Compliance**
